Recommended review sequence

Status: Proposed dependency-based review order, not assigned ownership or completed approval.

1. Authority and shared data: DOMAIN_AUTHORITY_MATRIX, EDUCATION_GRAPH_ARCHITECTURE, DATA_INVENTORY, DATA_CLASSIFICATION, SECURITY, PRIVACY.
2. Trust operations: DATA_RETENTION, LEGAL_HOLDS, VENDOR_RISK, INCIDENT_RESPONSE, BUSINESS_CONTINUITY, DISASTER_RECOVERY; review the five trust supplements alongside these drafts, not as replacements.
3. Delivery controls: ENGINEERING_STANDARDS, SECURE_SDLC, TEST_STRATEGY, ACCESSIBILITY_ARCHITECTURE, RELEASE_POLICY, OBSERVABILITY, SLO_POLICY, ERROR_BUDGET_POLICY, RUNBOOK_INDEX, BACKUP_RESTORE_TESTS, OPERATIONS_CONSOLE_ARCHITECTURE.
4. Governed AI: review existing AI_GOVERNANCE_POLICY; then AI_DATA_CLASSIFICATION, AI_PROVIDER_REGISTRY, AI_COURSE_POLICY_MODEL, AI_MODEL_ROUTING, AI_SPEND_AND_QUOTA_POLICY, AI_TRANSPARENCY_UX, AI_EVALUATION_HARNESS, AI_RED_TEAM_PLAN, AI_INCIDENT_RESPONSE.
5. Academic and integration authority: complete relevant native workflow specs, DATA_MAPPING_STANDARD, RECONCILIATION_STANDARD, INTEGRATION_GOVERNANCE, selected standards adapters, migration, dual-run and rollback. Define contracts jointly; enable writes only after authority and data controls pass.
6. Institutional procurement and pilot: HECVAT_ROADMAP, SECURITY_QUESTIONNAIRE_LIBRARY, PILOT_DELIVERY_FACTORY, customer success and sales handoff; use evidence-backed claims and institution approval.
7. Domain replacement and expansion: DOMAIN_REPLACEMENT_MATRIX, CONNECT_REPLACE_OPERATE_STRATEGY, offboarding, and approved business/finance/partnership work. Expansion remains scoped by proven readiness, not document count.

All streams can be drafted in parallel. Sequence expresses approval and activation dependencies, not a mandate to stop broad v1 design.
